

CALL FOR ASSOCIATES & COLLABORATORS

April – May 2022

Good Day potential Associate

CEO Squad is a young consultancy that provides support to executive teams and leaders of corporate and scale up organisations. Our core competency is in problem solving and soft skills support to business initiatives that have a strong technology dependency, from platform systems, mobile applications, desktop applications and data analytics. Our delivery framework is summarised in what we call our [TenDim](#) or ten dimensional approach to Product and Programme Management, starting from product feasibility assessments, delivery planning, due diligence, risk and portfolio management as well as account and change management.

We provide objective guidance to multiple industries, focused but not limited to insurance, banking, insurance, property, healthcare as well as community and public benefit organisations. In a consulting capacity, we fulfil the role as an independent member of client teams, introducing tools from our TenDim framework to enable/enhance a client's Product & Programme Office.

Over the last few weeks, new client engagements have started to mature and we have secured and are in the process of securing additional projects, predominantly in the 'HealthTech' space. For the immediate requirement, we are looking for associates in the following areas of expertise that have strong alignment to our TenDim approach:

1. Health systems Product Ownership or Business Analysis to unpack feature sets of new initiatives;
2. Project and Programme Management associates to run with projects post planning (business and technical);
3. Data and Platform System Architects/Consultants to assist with High Level Design (HLD), Solution Design and technical roadmap preparation;
4. Operations and Documentation specialists to consolidate and document SOPs and business process;
5. Technical Due Diligence specialists to validate 3rd party technical solutions (and operations)
6. Partnerships: Platform developers, web developers, mobile developers and data engineers to implement on plans with our clients.

If you are keen to collaborate on our projects in your day, evening or even weekend time, you can register your services as an individual or business via the "Join" page on <https://www.ceosquad.org/>. We will schedule a call with you thereafter.

Thank you and keep well,

CEO Squad Leadership
